How has working with Vivriti Capital aligned with your career aspirations and goals?

When I joined Vivriti, my goal was to evolve my skills in a challenging environment, work within a team, and provide efficient solutions. In the coming years, I aspire to reach a managerial position that will allow me to make crucial decisions, while applying my leadership skills.

Surendar B
Senior Manager - IT Infrastructure
Vivriti Capital

How would you describe the role of IT infrastructure in supporting our organization's business objectives and operations?

Business continuity is significantly supported by IT infrastructure, and it acts as any company's backbone. An organization may achieve its objectives and gain a competitive advantage in the market with the support of a flexible, dependable, and secure IT infrastructure.

On the other hand, improper implementation of an IT infra may result in problems for businesses in terms of productivity, connection, and security, including system outages and breaches. In general, whether a business is profitable can be influenced by the quality of its infrastructure.

How do you stay current with emerging technologies and what are some interest areas in the space currently?

I frequently attend seminars and external workshops to stay updated on recent developments and trends in technology. Data centres' future is anticipated to be influenced by cutting-edge technologies including artificial intelligence (AI), automation, and machine language (ML).

VIVRITI
CAPITAL

Vivriti Asset Management

What drives you at this organization and how can Vivriti accelerate one's career growth?

My positive attitude towards taking on new tasks and overcoming challenges with an open mind is what keeps me going at Vivriti.
